Designed for Macs: Premium aluminium alloy stylishly compliments Apple devices perfectly, and is designed for Macbook Air / Macbook Pro / iPad Pro, or other 13-15 inch laptops.

Anti-slip rubber pads: Rubber silicone pads help secure your laptop, and anti slip feet prevent slippage even on shiny surfaces.

Increases cooling and airflow: The open wedge design increases cooling and airflow around the laptop whilst working.

Foldable and portable design: Convenient to carry, just slip the stand easily into your bag.

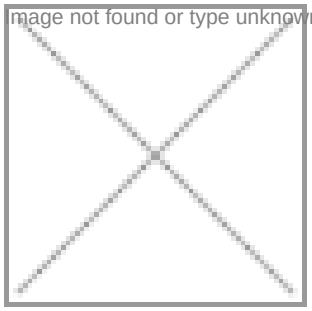
Precision engineering

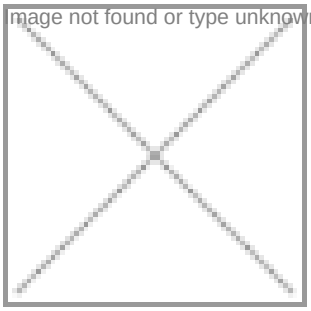
Crafted from premium aluminium

A minimalistic, modern design crafted out of a refined, premium silver anodised aluminium alloy that stylishly compliments computers and products such as Macs, iMacs, and MacBooks. Silver anodising is an electrochemical process that converts a metal surface into a decorative, durable, corrosion-resistant, anodic oxide finish. Anodised aluminium is considered environmentally safe, producing few, if any, harmful effects on land, air, or water.



Tactile anti-slip rubber pads

The Stand features several built-in silicone rubber pads placed tactically on the base and top surface to keep your Laptop securely in place and prevent it from falling. Silicone rubber is a great means of providing a non-slip quality to a surface; their anti-slip, grip-like qualities ensuring that your stand will not only stay fixed, but will also leave no residue when removed.



An elevated, open design

Laptops and other electrical products contain microprocessors and power handling semiconductors that require a heat sink to reduce their temperature through increased thermal mass and heat dissipation. The aluminium alloy used to construct the Supreme stand provides the perfect thermal conductor, and the elevated, open design improves airflow around your Laptop whilst working; providing better cooling, heat dissipation and a quieter performance.

Product description

Perhaps you are the kind of person who desires perfection. Perhaps you long for an object that is both a companion on your travels, but also seamlessly integrates into your living space; with a kind of finish that allows your fingers to lightly brush over sleek, refined aluminium.

Perhaps you are also the kind of person who desires performance, which means you strive for superior, long-lasting build quality in a foldable, portable design.

And if you are - Then are you also the kind of person who, above all else, desires protection? Protection of your device, and protection of yourself...?

Then this - is the Desire2 View My Screen Anywhere presented in sleek, refined aluminium.

With it's ergonomically designed 18 degree elevation providing you ultimate viewing comfort, and an open design for increasing airflow and cooling around your laptop whilst working that is completely foldable to easily slip into your bag, the Desire2 View My Screen Anywhere could be your ultimate object of desire.
